NANO-TEX CUT YARDAGE PROGRAM

The performance design of the Nanotex treatment bonds with our textiles at a molecular level, rather than just coating. Stain repellent molecules adhere to each fiber of the textile, without a thick layer of chemicals on the face of the fabric. The beauty of the textile remains intact; our linen and cotton fabrics remain with their original hand.

For an additional fee, clients can choose to add an extra layer of protection to their fabrics, and RTMH will have the order treated with Nano-Tex. RTMH oversees the complete process, from start to finish, including order processing to finishing to shipping product direct to your client. Please contact your RTMH textiles sales representative for more details.

IMPORTANT NOTES ABOUT NANO-TEX

If you are using a fabric that has been treated with Nanotex for a slipcover, the fabric should be preshrunk prior to processing. Nanotex will protect the fabric for approximately 15–20 wash cycles. Liquid spills should be lifted from the fabric using an absorbent cloth. Solid spills should be allowed to dry, lifted by a vacuum as much as possible, then lightly washed using water and mild soap. Contact your sales representative for more information about RTMH’s Nano-Tex program. Contract and Hospitality inquiries welcome.

BASIC NANO-TEX PRICING:

- Set up fee: \$150
- Price/yard: \$4.50
- Please double all freight charges on orders requiring Nano-Tex
- Please allow 2 ½ weeks for treatment and shipping
